

SAHIL SHITOLE

Software Engineer – Applied AI & Backend | Python | FastAPI | Java | Spring Boot

Pune, Maharashtra, India | +91-7620919774 | sahilmshitole1483@gmail.com | linkedin.com/in/sahil-shitole | github.com/Sms1818

Technical Skills

Languages: Java, Python, SQL

Backend & Frameworks: FastAPI, Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, Flask

Applied AI & Automation: LLM APIs, RAG, LangChain, Pinecone, Prompt Engineering, Workflow Automation, API Integrations

Architecture & Practices: Microservices, REST API Design, Event-Driven Architecture, System Design, OOP, JWT/RBAC, API Security

Databases & Messaging: PostgreSQL, MySQL, SQL Server, Apache Kafka

Cloud, DevOps & Tools: DigitalOcean, Docker, Kubernetes, GitHub Actions CI/CD, Maven, Git, Bitbucket

Professional Experience

Neopart Transit LLC (via Blue Ocean Global) — Software Engineer, Backend & Automation Jan 2025 – May 2026
Official designation: Data Analyst (Blue Ocean Global)

- Architected an **AR escalation engine for 50+ customer accounts**, using **LLMs** to interpret unstructured customer interactions while deterministic rules managed payment commitments, follow-up timing, and escalation workflows.
- Built **Python/FastAPI integrations** across **Quickbase, OptimoRoute, QuickBooks, and Office 365** via REST APIs, automating AR follow-ups, field-visit scheduling, and operational workflows.
- Developed a **B2B customer portal backend** supporting DPF scheduling, parts ordering, and tiered pricing with role-based access control using **Spring Security and JWT**.
- Consolidated **4 legacy accounting applications** into **Spring Boot microservices** with RESTful APIs and MySQL, improving maintainability across accounting workflows.
- Built secure REST APIs using **Spring Boot, Spring Data JPA, and Hibernate**, implementing Spring Security, JWT authentication, and role-based access control.
- Built and maintained **GitHub Actions CI/CD pipelines** on **DigitalOcean**, managing production deployments, infrastructure operations, and backend debugging.
- Developed Python, Java, and SQL Server automations that eliminated **approximately 4 hours of recurring manual reporting work per week**.

Projects

PRSense – Event-Driven Code Review Platform

Java, Spring Boot, Apache Kafka, PostgreSQL, Gemini AI, Docker, Kubernetes

- Built a **Java 21/Spring Boot microservices** platform that automatically reviews Bitbucket pull requests using **JGit diff analysis and Gemini 2.5 Flash**.
- Designed an **event-driven review pipeline with Kafka**, Bitbucket webhooks/APIs, and PostgreSQL, publishing structured AI-generated feedback directly to pull requests.
- Containerized services with **Docker and Kubernetes**, implementing Kubernetes Secrets, SSH-based repository cloning, and automated PR comment generation.

SupportSync – Intelligent Support Platform

Python, FastAPI, LangChain, MySQL, Pinecone, Docker

- Built a **FastAPI-based support platform** integrating **Jira, ClickUp, and Salesforce** to centralize ticket data and generate context-aware resolution suggestions.
- Implemented **semantic retrieval with LangChain and Pinecone** to surface relevant historical tickets and generate context-aware support recommendations.
- Built a **document-enabled AI chatbot** and containerized the application end-to-end with **Docker** for consistent development and deployment environments.

Education

Bachelor of Technology – Computer Science Engineering

2021 – 2025

Vishwakarma Institute of Technology, Pune | **CGPA: 8.71/10.0** | DSA, DBMS, OS, Computer Networks, OOP
